Systematic Ventilation.

Product description

The compact ventilation unit LG 350 and LG 450 comprise a compact thermally insulated EPP housing without thermal bridges, of galvanized sheet steel, externally powder-coated in RAL 9003. They have a highly efficient heat recovery system with an air/air counterflow heat exchanger made of recyclable plastic, with automatic 100 % bypass and energy-saving radial fans driven by the latest EC motor technology. The integrated air flow rate measurement guarantees balanced operation on the supply and extract air sides. An expansion option to implement constant pressure control is also optionally available. The standard air filters used are of filter class ODA ISO ePM1 60% for the outdoor air and of filter class ETA ISO Coarse 80% for the extract air. The operation is simple and intuitive via the MINI or TOUCH (optional) operating control unit and with connection to the Internet (LAN connection) via the Pichler app. The unit can be optionally expanded by adding CO_2, humidity and indoor temperature sensors, which allows for demand-controlled ventilation operation. The compact ventilation units LG 350 and LG 450 are suitable for floor or wall mounting (removable adjustable foot brackets) in frost-free rooms.
Area of application

The compact ventilation unit LG 350 and LG 450 are used for the controlled mechanical supply and extract air ventilation of larger residental houses, offices and similar applications. The range of use extends fundamentally to living spaces from approx. 100 m² to approx. 350 m² in passive or low energy structures, with an adjustable air volume flow of up to 350 m³/h (LG 350) or 450 m³/h (LG 450).

# Layout sketch (standing or wall-mounted installation, left-hand version)

Dimensions: (W x H x D) 829 x 950 x 571 mm

Technical data

Equipment type	LG 350 (V)	LG 350 F (V)	LG 450 (V)	LG 450 F (V)
Heat exchanger	Standard	Enthalpy exchanger	Standard	Enthalpy exchanger
Air volume flow min. - max. (adjustable in steps of 5 m³/h)	50 - 350 m³/h	50 - 350 m³/h	50 - 450 m³/h	50 - 450 m³/h

Characteristic values in compliance with EN13141-7:2010				
Temperature ratio $\eta_{\Theta,su}$[1]	93 %	81 %	91 %	79 %
Temperature ratio $\eta_{\Theta,EX}$[1]	86 %	75 %	84 %	71 %
Specific input power SIP [1]	0,18 Wh/m³	0,16 Wh/m³	0,22 Wh/m³	0,21 Wh/m³
Specific input power SIP [2]	0,19 Wh/m³	0,17 Wh/m³	0,24 Wh/m³	0,21 Wh/m³
External leakage	< 0,50 %		< 0,40 %	
Internal leakage	< 0,50 %		< 0,40 %	

Characteristic values in compliance with PHI criteria				
Certified range of application	71 - 277 m³/h		71 - 350 m³/h	
Heat provision level $\eta_{ef,HR}$ Application range in compliance with PHI	90 %	85 %	89 %	81 %
Moisture recovery	-	76 %	-	76 %
Power efficiency η_{elec}	0,22 Wh/m³	0,22 Wh/m³	0,25 Wh/m³	0,24 Wh/m³
Power consumption in standby operation	3 W			

Classification of air filters in accordance with EN ISO 16890	
(Filter ODA (Outdoor air)	ISO ePM1 60%
Filter ETA (Extract air)	ISO Coarse 80%

Operating conditions	
Permissible ambient temperature (place of installation)	+5 to +35 °C
Permissible operating temperature (outside air)	-15 to +35 °C

Electrical system		
Electrical connection	230 V / 1 ~ / 50 Hz / 16 A	
IP classification	IP40 with connected air ducts	
Max. power without VHR	180 W	350 W
Max. power with VHR	2050 W	2250 W

Materials	
Inner part	EPP and galvanised sheet steel
Housing	Galvanised sheet steel and powder-coated in RAL 9003
Heat exchanger	Polystyrene with flame protection grid
Enthalpy exchanger	Polymer membrane

Housing	
Air duct connections	4 x Ø 160 mm (for steel nipples safe or EPP sleeve DN160)
Condensate drainage	AG 1 1/4"
Dimensions (W x H x D)	829 x 950 x 571 mm
Weight without optional accessories	approx. 56 kg

[1] with 70 % of the max. volume flow
[2] according to the calculation basis in compliance with prEN13171-7: 2018 based on air temperature 20 °C

Characteristic curve – external pressure increase – air volume flow rate

The characteristic curves shown are applicable to unit type with outdoor air (filter ODA ISO ePM1 60%) and extract air filter (filter ETA ISO Coarse 80%) and with an electrical pre-heater battery. The total power specified takes the power consumption for the two fans in the supply air and exhaust air as well as the power consumption of the controller into consideration. **Note:** Depending on the installed air duct system, the maximum air volume flow may not be achieved in bypass mode.

TOUCH operating control unit

Pichler-App

Swiveling console

Operation

BYPASS FOR HEAT EXCHANGER

The 100% bypass is controlled based on the measured exhaust air and outdoor temperatures. In this way, the heat exchanger is bypassed in summer and the cool outdoor air can be blown directly into the living area, or via an existing ground collector.

CONTROLLER

Scalable expansion of the control system is possible, from low-cost to high-end. Further options include connections to an external building control system using Modbus RTU and sensors to monitor room air quality.
Ventilation unit settings are made via a control unit. A MINI operating unit as a compact flush operating unit or optional a TOUCH operating unit as a surface-mounted version can be chosen to control and operate the ventilation unit.
Connection to a building automation via integrated Modbus RTU interface. Optionally, a gateway for the KNX bus system is also available.

MINI CONTROL UNIT

The MINI control unit is used to control the ventilation unit. It is easy to operate and enables the configuration of ventilation levels, switching between summer and winter mode, setting of basic volume flow, etc. In addition, the control unit displays operating status and any faults that may occur. The USB interface on the operating unit is fitted as standard. Installation is on a flush-mounted box (not included in delivery).

TOUCH CONTROL UNIT

The control unit with a 4.3'' colour-touch-display is used to control the ventilation unit. Operation is simple and intuitive. The most important settings and readings are very easy to make. The user-friendly handling provides for automatic or manual setting of the ventilation levels. In Automatic mode, the system is controlled by programmable time programmes, closed-loop humidity or CO_2 controls and works in a fully automated fashion, whereas in manual mode ventilation levels may, for instance, be individually increased (boost ventilation). Further functions are the changeover function between summer and winter operation as well as the setting for the volume flows. The operating mode, temperatures, a required filter change and possible faults are displayed in plain text. The control unit also has an integrated temperature sensor, which can be used as a room temperature sensor when needed. Installation is on a flush-mounted box (not included in delivery).

Advantages of controlling:
• Easy display of current operating settings
• Individually adjustable air volumes
• Time and weekly programs (TOUCH only)

Item	Item number
STANDARD: operating control unit MINI for LG 350 and 450	08LGMINI350450
OPTIONAL: operating control unit TOUCH for LG 350 and LG 450	08LG350450T
OPTIONAL: Swivel bracket for attaching the TOUCH or MINI control unit directly to the ventilation unit	40LG350BG142

EASY OPERATION WITH THE PICHLER APP

User-friendly: the compact ventilation unit can be operated easily with our free smartphone app for Android and iOS, whether you are at home or out and about.

REMOTE ACCESS / PICHLER CONNECT

Operational safety: Remote access faciliates a prompt response with minimal effort for the Pichler customer service in the event of a malfunction.
⚙ **PICHLER**
connect.

CO₂ sensor

Room temperature, humidity and CO₂ sensor with Modbus communication

External dual pressure sensor set

Accessories

SPARE FILTER

Will ensure perfect hygiene and air quality given regular replacement, also proper functionality and efficient operation of the equipment.

Item	Item number
Filter ETA ISO Coarse 80% (Extract air)	40LG0500000A
Filter ODA ISO ePM1 60% (Outdoor air)	40LG0500001A

EXTERNAL DUAL PRESSURE SENSOR SET

Pressure sensors for external mounting including a connection kit. Serves to ensure constant pressure control of the ventilation unit.

Item	Item number
External dual pressure sensor set with Modbus communication	08LGDRUCKDUALSET

DEMAND-ORIENTED VENTILATION CONTROL

CO_2, humidity and room temperature sensors for demand-oriented ventilation control. The ventilation unit will automatically increase or reduce the air volumes depending on the quality of the air in the room. The sensor in the surface-mounted housing is suitable for wall mounting.

Colour: white
Dimensions: W x H x D = 85 x 85 x 35 mm
Ambient temperature: 10-50°C
Measuring range: 0-2000 ppm
Sensor supply voltage: 24V AC/DC
Control signal: 0-10 V

Item	Item number
CO₂ sensor	07RCO248330

Colour: white
Dimensions: W x H x D = 85 x 85 x 35 mm
Ambient temperature: 0-60° C (no condensation)
Measuring range: 0-100% RH
Sensor supply voltage: 24V AC/DC
Control signal: 0-10 V

Item	Item number
Humidity sensor	07RHF49360

Type of room temperature sensor: NTC 10k
Dimensions: W x H x D = 85 x 85 x 35 mm

Item	Artikelnummer
Room temperature sensor	07RTF49357

Colour: white
Dimensions: W x H x D = 70 x 70 x 30 mm
Measuring range: 400-2000 ppm, accuracy: ±(30 ppm + 3 %)
Measuring range temperature: 0-45°C, accuracy: ±3 %
Measuring range: 11-89 % RH, accuracy: ±3 %
Sensor supply voltage: 12-24 VDC

Item	Item number
Room temperature, humidity and CO₂ sensor with Modbus communication (Modbus-Cable not included in delivery)	07RTRHCO248401

WIRELESS ROOM TEMPERATURE, HUMIDITY AND/OR CO_2 SENSORS WITH MODBUS/MIWI COMMUNICATION FOR DEMAND-BASED VENTILATION CONTROL

The Modbus/MIWI gateway is a receiver for wireless sensors and communicates via 0-10V output or via Modbus. The receiver is delivered in an external box for connection to the ventilation unit. The receiver should be installed outside the ventilation unit. This provides the best signal reception from the wireless sensors. The measurements of the wireless sensors are sent to the receiver via MiWi. Under normal circumstances, the range is approx. 20 m, which can be extended by setting up repeaters. The sensor and network number can be easily set with the DIP switch under the lid. If a 0-10V signal is used, only one sensor's signal can be received. Up to 6 wireless sensors can be connected via Modbus.

Modbus/MiWi Gateway

Wireless room temperature and humidity sensor with/without CO_2 for surface installation

Modbus/KNX Gateway

Accessories

MODBUS/MIWI GATEWAY

- *Dimensions:* W x H x D = 138 x 64 x 30 mm
- *Number of controllable wireless sensors via Modbus output:* up to 32

  Measurement range: 0 – 40 °C
- *Humidity sensor accuracy:* 4%
  Measurement range: 0 – 80% RH
- *CO_2 sensor accuracy:* 0 – 2000 ppm
  Measurement range: 0 – 10 000 ppm
- *IP protection class:* IP 22
- *Ambient temperature during operation:* 0 – 40 °C

Item	Item number
Wireless room temperature, humidity and CO_2 sensor for surface mounting	07MIWIRTRHCO2

MODBUS/KNX GATEWAY

The Modbus/KNX gateway allows for the connection of the ventilation unit to a KNX bus system. In this process, the gateway serves as a connective link between the two bus systems. Note that the master is always on the Modbus. On the KNX side, however, it responds like a common KNX TP-1 unit. This makes it possible to centrally control and monitor the ventilation unit by a KNX system. In order to facilitate the configuration, ETS template projects are provided for download for a variety of ventilation units.

Dimensions: L x W x D = 18 x 100 x 60 mm
Mounting: top hat rail or wall
Permissible ambient temperature: -5 to 45 °C
Permissible humidity: 5 – 93 % non-condensing
*Protection class:* IP20
Voltage: 12...24V DC
Interfaces: Ethernet, EIA-485, KNX-TP1

External electric re-heating battery	08CV16121MTXL

EXTERNAL CABLE TEMPERATURE SENSOR

NTC thermistor sensor with metal sleeve required for operation of the cold water coil, hot water heating coil, or electric re-heating battery.

Item	Item number
NTC thermistor sensor, length 2 m	40LG041920

CONDENSATE SIPHON

DN40 condensate siphon with vertical connection 5/4", water odour seal (60 mm) and mechanical odour seal.

Item	Item number
Condensate siphon DN40 x 5/4"	40LG030620

BUTTERFLY VALVES

Butterfly valve. Made from galvanized sheet steel with double-lip sealing.

Item	Item number
Butterfly valve AKR Ø 160 mm with motor LF 230	02AKR160LF230
Butterfly valve AKR Ø 200 mm with motor LF 230	02AKR200LF230

PRESENCE AND MOTION DETECTOR FOR FLUSH-MOUNTED, SURFACE-MOUNTED AND CEILING INSTALLATION

The flush-mounted presence detector for ceiling installation is ideally suited for presence areas in offices, conference rooms, lounges, cellar rooms, etc.

Technical specifications:
Voltage: 230 V AC
Potential-free normally open contact 10 A

DETECTION ZONE:
Ceiling height: 3 m
2 detection zones: Presence detector: detects seated or other stationary activities = 4 x 4 m. Motion detector: detects movements of objects with body temperature = 8 x 8 m
Detection zone: 360°
Degree of protection: IP40 indoor installation
*Visible dimensions:* W x H x D: 88 x 88 x 35 mm
Dimensions: W x H x D: 84 x 84 x 35,1 mm

| Item	Item number
Presence detector	07UPPM360

COMPLETE PROGRAM FOR AIR DISTRIBUTION SYSTEMS

We offer a complete program of air distribution systems, such as Komflex (round or oval). Details of our air distribution program can be found in the technical documentation.
